U.S. Immigration Policy on Permanent Admissions

Summary

When President George W. Bush announced his principles for immigration reform in January 2004, he included an increase in permanent immigration as a key component. President Bush has stated that immigration reform is a top priority of his second term and has prompted a lively debate on the issue. Bills to revise permanent admissions are being introduced, but only one has had legislative action thus far in the 109th Congress. A provision in P.L. 109-13 (H.R. 1268, the emergency FY2005 supplemental appropriation) makes up to 50,000 employment-based visas available for foreign nationals coming to work as medical professionals.

The Comprehensive Immigration Reform Act (S. 2611/S. 2612) would substantially increase legal immigration and would restructure the allocation of these visas. Title V of S. 2611/S. 2612 would potentially double the number of family-based and employment-based immigrants admitted over the next decade, as well as expand the categories of immigrants who may come without numerical limits. Title IV of S. 2454, which Senate Majority Leader Bill Frist introduced, as well as Title V in the Senate Judiciary Committee mark had similar provisions, but lower levels of employment-based immigration. Proposals to alter permanent admissions are included in several other comprehensive immigration proposals (S. 1033/H.R. 2330, S. 1438, H.R. 3700, H.R. 3938, S. 1919).

Four major principles underlie current U.S. policy on permanent immigration: the reunification of families, the admission of immigrants with needed skills, the protection of refugees, and the diversity of admissions by country of origin. These principles are embodied in the Immigration and Nationality Act (INA). The INA specifies a complex set of numerical limits and preference categories that give priorities for permanent immigration reflecting these principles. Legal permanent residents (LPRs) refer to foreign nationals who live lawfully and permanently in the United States.

During FY2004, a total of 946,142 aliens became LPRs in the United States. Of this total, 65.6% entered on the basis of family ties. Additional major immigrant groups in FY2004 were employment-based preference immigrants (including spouses and children) at 16.4%, and refugees and asylees adjusting to LPR status at 7.5%. Mexico led all countries with 175,364 aliens who became LPRs in the United States. India followed at a distant second with 70,116 LPRs. The Philippines was third with 57,827. These three countries comprised almost one-third of all LPRs in FY2004.

Significant backlogs are due to the sheer volume of aliens eligible to immigrate to the United States. Citizens and LPRs often wait several years for the relatives’ petitions to be processed. After USCIS processes the petitions, the relatives of U.S. citizens and LPRs then wait for a visa to become available through the numerically limited categories. The siblings of U.S. citizens are waiting 12 years. Unmarried adult sons and daughters of U.S. citizens who filed petitions five years ago are now eligible for visas. Prospective LPRs from the Philippines have the most substantial waiting times; consular officers are now considering the petitions of the brothers and sisters of U.S. citizens from the Philippines who filed more than 22 years ago.

Latest Legislative Developments

The Senate is expected to consider major immigration legislation before the Memorial Day recess.1 The Senate debated immigration reform from late March through early April 2006, but efforts to invoke cloture failed. At that time, the leading proposals included S. 2454, the Securing America’s Borders Act, which Senate Majority Leader Bill Frist introduced on March 16, 2006, and S.Amdt. 3192 to S. 2454, the Comprehensive Immigration Reform Act, which Judiciary Chairman Arlen Specter offered on March 30, 2006.2 Title IV of S. 2454 and Title V of S.Amdt. 3192, which are essentially equivalent, would substantially increase legal permanent immigration and would restructure the allocation of the family-sponsored and employment-based visas.

The legislative proposal reportedly coming to the Senate floor as early as next week is based on a compromise that Senators Chuck Hagel and Mel Martinez shaped and introduced April 7, 2006, along with co-sponsors Sam Brownback, Lindsey Graham, Ted Kennedy, John McCain and Arlen Specter. The identical language has been introduced by Senator Specter (S. 2611) and Senator Hagel (S. 2612). Much like S. 2454 and S.Amdt. 3192, S. 2611/S. 2612 would substantially increase legal permanent immigration and would restructure the allocation of the family-sponsored and employment-based visas.

None of the provisions in Title IV of S. 2454, Title V of S.Amdt. 3192, or Title V of S. 2611/S. 2612 is in H.R. 4437, the Border Protection, Antiterrorism, and Illegal Immigration Control Act of 2005, as passed by the House on December 16, 2005.

Overview

Four major principles currently underlie U.S. policy on legal permanent immigration: the reunification of families, the admission of immigrants with needed skills, the protection of refugees, and the diversity of admissions by country of origin. These principles are embodied in federal law, the Immigration and Nationality Act

---

1 For background and legislative tracking, see CRS Report RL33125, Immigration Legislation and Issues in the 109th Congress, coordinated by Andorra Bruno.

2 S.Amdt. 3192 is based on the legislative language that the Senate Committee on the Judiciary approved on March 27, 2006.
(INA) first codified in 1952. The Immigration Amendments of 1965 replaced the national origins quota system (enacted after World War I) with per-country ceilings, and the statutory provisions regulating permanent immigration to the United States were last revised significantly by the Immigration Act of 1990.3

The two basic types of legal aliens are immigrants and nonimmigrants. As defined in the INA, immigrants are synonymous with legal permanent residents (LPRs) and refer to foreign nationals who come to live lawfully and permanently in the United States. The other major class of legal aliens are nonimmigrants — such as tourists, foreign students, diplomats, temporary agricultural workers, exchange visitors, or intracompany business personnel — who are admitted for a specific purpose and a temporary period of time. Nonimmigrants are required to leave the country when their visas expire, though certain classes of nonimmigrants may adjust to LPR status if they otherwise qualify.4

The conditions for the admission of immigrants are much more stringent than nonimmigrants, and many fewer immigrants than nonimmigrants are admitted. Once admitted, however, immigrants are subject to few restrictions; for example, they may accept and change employment, and may apply for U.S. citizenship through the naturalization process, generally after five years.

Petitions for immigrant (i.e., LPR) status are first filed with U.S. Citizenship and Immigration Services (USCIS) in the Department of Homeland Security (DHS) by the sponsoring relative or employer in the United States. If the prospective immigrant is already residing in the United States, the USCIS handles the entire process, which is called “adjustment of status” because the alien is moving from a temporary category to LPR status. If the prospective LPR does not have legal residence in the United States, the petition is forwarded to the Department of State’s (DOS) Bureau of Consular Affairs in their home country after USCIS has reviewed it. The Consular Affairs officer (when the alien is coming from abroad) and USCIS adjudicator (when the alien is adjusting status in the United States) must be satisfied that the alien is entitled to the immigrant status. These reviews are intended to ensure that they are not ineligible for visas or admission under the grounds for inadmissibility spelled out in INA.5

---

3 Congress has significantly amended the INA numerous times since 1952. Other major laws amending the INA are the Refugee Act of 1980, the Immigration Reform and Control Act of 1986, and Illegal Immigration Reform and Immigrant Responsibility Act of 1996. 8 U.S.C. §1101 et seq.

4 Nonimmigrants are often referred to by the letter that denotes their specific provision in the statute, such as H-2A agricultural workers, F-1 foreign students, or J-1 cultural exchange visitors. CRS Report RL31381, U.S. Immigration Policy on Temporary Admissions, by Ruth Ellen Wasem.

5 These include criminal, national security, health, and indigence grounds as well as past violations of immigration law. § 212(a) of INA.
Many LPRs are adjusting status from within the United States rather than receiving visas issued abroad by Consular Affairs. In FY2004, a total of 679,305 aliens (64%) adjusted to LPR status in the United States while only 384,427 arrived as LPRs from abroad. More than three-fourths (77%) of the employment-based immigrants, two-thirds (63%) of the immediate relatives of U.S. citizens, and only one-third (34%) of the other family-preference immigrants adjusted to LPR status within the United States.

The INA specifies that each year countries are held to a numerical limit of 7% of the worldwide level of U.S. immigrant admissions, known as per-country limits. The actual number of immigrants that may be approved from a given country, however, is not a simple percentage calculation. Immigrant admissions and adjustments to LPR status are subject to a complex set of numerical limits and preference categories that give priority for admission on the basis of family relationships, needed skills, and geographic diversity, as discussed below.

## Current Law and Policy

### Worldwide Immigration Levels

The INA provides for a permanent annual worldwide level of 675,000 legal permanent residents (LPRs), but this level is flexible and certain categories of LPRs are permitted to exceed the limits, as described below. The permanent worldwide immigrant level consists of the following components: family-sponsored immigrants, including immediate relatives of U.S. citizens and family-sponsored preference immigrants (480,000 plus certain unused employment-based preference numbers from the prior year); employment-based preference immigrants (140,000 plus certain unused family preference numbers from the prior year); and diversity immigrants (55,000). Immediate relatives of U.S. citizens as well as refugees and asylees who are adjusting status are exempt from direct numerical limits.

---

7 Immigrants are aliens who are admitted as LPRs or who adjust to LPR status within the United States.

8 § 201 of INA; 8 U.S.C. § 1151.

10 “Immediate relatives” are defined by the INA to include the spouses and unmarried minor children of U.S. citizens, and the parents of adult U.S. citizens.

Source: CRS summary of §§ 203(a), 203(b), and 204 of INA; 8 U.S.C. § 1153.

The annual level of family-sponsored preference immigrants is determined by subtracting the number of immediate relative visas issued in the previous year and the number of aliens paroled into the United States for at least a year from 480,000 (the total family-sponsored level) and — when available — adding employment preference immigrant numbers unused during the previous year. By law, the family-sponsored preference level may not fall below 226,000. In recent years, the 480,000 level has been exceeded to maintain the 226,000 floor on family-sponsored preference visas after subtraction of the immediate relative visas.

12 “Parole” is a term in immigration law which means that the alien has been granted temporary permission to be present in the United States. Parole does not constitute formal admission to the United States and parolees are required to leave when the terms of their parole expire, or if otherwise eligible, to be admitted in a lawful status.
Within each family and employment preference, the INA further allocates the number of LPRs issued visas each year. As Table 1 summarizes the legal immigration preference system, the complexity of the allocations becomes apparent. Note that in most instances unused visa numbers are allowed to roll down to the next preference category.\(^{13}\)

Employers who seek to hire prospective employment-based immigrants through the second and third preference categories also must petition the U.S. Department of Labor (DOL) on behalf of the alien. The prospective immigrant must demonstrate that he or she meets the qualifications for the particular job as well as the preference category. If DOL determines that a labor shortage exists in the occupation for which the petition is filed, labor certification will be issued. If there is not a labor shortage in the given occupation, the employer must submit evidence of extensive recruitment efforts in order to obtain certification.\(^{14}\)

**Per-Country Ceilings**

As stated earlier, the INA establishes per-country levels at 7% of the worldwide level.\(^{15}\) For a dependent foreign state, the per-country ceiling is 2%. The per-country level is not a “quota” set aside for individual countries, as each country in the world, of course, could not receive 7% of the overall limit. As the State Department describes, the per-country level “is not an entitlement but a barrier against monopolization.”

Two important exceptions to the per-country ceilings have been enacted in the past decade. Foremost is an exception for certain family-sponsored immigrants. More specifically, the INA states that 75% of the visas allocated to spouses and children of LPRs (2\(^{nd}\)A family preference) are not subject to the per-country ceiling.\(^{16}\) Prior to FY2001, employment-based preference immigrants were also held to per-country ceilings. The American Competitiveness in the Twenty-First Century Act of 2000 (P.L. 106-313) enabled the per-country ceilings for employment-based immigrants to be surpassed for individual countries that are oversubscribed as long as visas are available within the worldwide limit for employment-based preferences. The impact of these revisions to the per-country ceilings is discussed later in this report.

---

\(^{13}\) Employment-based allocations are further affected by § 203(e) of the Nicaraguan and Central American Relief Act (NACARA), as amended by § 1(e) of P.L. 105-139. This provision states that when the employment 3\(^{rd}\) preference “other worker” (OW) cut-off date reached the priority date of the latest OW petition approved prior to November 19, 1997, the 10,000 OW numbers available for a fiscal year are to be reduced by up to 5,000 annually beginning in the following fiscal year. This reduction is to be made for as long as necessary to offset adjustments under NACARA. Since the OW cut-off date reached Nov. 19, 1997 during FY2001, the reduction in the OW limit to 5,000 began in FY2002.

\(^{15}\) § 202(a)(2) of the INA; 8 U.S.C. § 1151.

\(^{16}\) § 202(a)(4) of the INA; 8 U.S.C. § 1151.
The actual per-country ceiling varies from year to year according to the prior year’s immediate relative and parolee admissions and unused visas that roll over. In FY2003, the per-country ceiling was set at 27,827 and in FY2002 was 25,804. According to the Department of State’s Bureau of Consular Affairs, the ceiling for FY2004 was expected to be about 30,000. Processing backlogs, discussed later in this report, also inadvertently reduced the number of LPRs in FY2003. Only 705,827 people became LPRs in FY2003. USCIS was only able to process 161,579 of the potential 226,000 family-sponsored LPRs in FY2003, and thus 64,421 LPR visas rolled over to the FY2004 employment-based categories.17

Other Permanent Immigration Categories

There are several other major categories of legal permanent immigration in addition to the family-sponsored and employment-based preference categories. These classes of LPRs cover a variety of cases, ranging from aliens who win the Diversity Visa Lottery to aliens in removal (i.e., deportation) proceedings granted LPR status by an immigration judge because of exceptional and extremely unusual hardship. Table 2 summarizes these major classes and identifies whether they are numerically limited.

Admissions Trends

Immigration Patterns, 1900-2004

Immigration to the United States is not totally determined by shifts in flow that occur as a result of lawmakers revising the allocations. Immigration to the United States plummeted in the middle of the 20th Century largely as a result of factors brought on by the Great Depression and World War II. There are a variety of “push-pull” factors that drive immigration. Push factors from the immigrant-sending countries include such circumstances as civil wars and political unrest, economic deprivation and limited job opportunities, and catastrophic natural disasters. Pull factors in the United States include such features as strong employment conditions, reunion with family, and quality of life considerations. A corollary factor is the extent that aliens may be able to migrate to other “desirable” countries that offer circumstances and opportunities comparable to the United States.

The annual number of LPRs admitted or adjusted in the United States rose gradually after World War II, as Figure 1 illustrates. However, the annual admissions have not reached the peaks of the early 20th century. The DHS Office of Immigration Statistics (OIS) data present those admitted as LPRs or those adjusting to LPR status. The growth in immigration after 1980 is partly attributable to the total number of admissions under the basic system, consisting of immigrants entering through a preference system as well as immediate relatives of U.S. citizens, that was augmented considerably by legalized aliens.18 The Immigration Act of 1990 increased the ceiling on employment-based preference immigration, with the provision that unused employment visas would be made available the following year for family preference immigration. In addition, the number of refugees admitted increased from 718,000 in the period 1966-1980 to 1.6 million during the period 1981-1995, after the enactment of the Refugee Act of 1980.

---

18 The Immigration Reform and Control Act of 1986 legalized several million aliens residing in the United States without authorization.
Many LPRs are adjusting status from within the United States rather than receiving visas issued abroad by Consular Affairs before they arrive in the United States. In the past decade, the number of LPRs arriving from abroad has remained somewhat steady, hovering between a high of 421,405 in FY1996 and a low of 358,411 in FY2003. Adjustments to LPR status in the United States has fluctuated over the same period, from a low of 244,793 in FY1999 to a high of 679,305 in FY2002. As Figure 2 shows, most of the variation in total number of aliens granted LPR status over the past decade is due to the number of adjustments processed in the United States. In FY2004, 61.7% (583,921) of all LPRs were adjusting status within the United States.

In any given period of United States history, a handful of countries have dominated the flow of immigrants, but the dominant countries have varied over time. Figure 3 presents trends in the top immigrant-sending countries (together comprising at least 50% of the immigrants admitted) for selected decades and illustrates that immigration at the close of the 20th century is not as dominated by a few countries as it was earlier in the century. This finding suggests that the per-country ceilings established in 1965 had some effect. As Figure 3 illustrates, immigrants from only three or four countries made up more than half of all LPRs prior to 1960. By the last two decades of the 20th century, immigrants from seven to eight countries comprised about half of all LPRs and this pattern has continued into the 21st century.

The largest group in the “other category” are aliens who adjusted to LPR status through cancellation of removal and through §202 and §203 of the Nicaraguan and Central American

Although Europe was home to the countries sending the most immigrants during the early 20th century, Mexico has been a top sending country for most of the 20th century. Other top sending countries from the Western Hemisphere are the Dominican Republic and most recently — El Salvador and Cuba. In addition, Asian countries — notably the Philippines, India, China, Korea, and Vietnam — have emerged as top sending countries today.

FY2004 Admissions

During FY2004, a total of 946,142 aliens became LPRs in the United States. The largest number of immigrants are admitted because of a family relationship with a U.S. citizen or resident immigrant, as Figure 4 illustrates. Of the total LPRs in FY2004, 65.6% entered on the basis of family ties. Immediate relatives of U.S. citizens made up the single largest group of immigrants, as Table 3 indicates. Family preference immigrants — the spouses and children of immigrants, the adult children of U.S. citizens, and the siblings of adult U.S. citizens — were the second largest group. Additional major immigrant groups in FY2004 were employment-based preference immigrants (including spouses and children) at 16.4%, and refugees and asylees adjusting to immigrant status at 7.5%.\(^{19}\)

\(^{19}\) The largest group in the “other category” are aliens who adjusted to LPR status through cancellation of removal and through §202 and §203 of the Nicaraguan and Central American

Figure 4. Legal Immigrants by Major Category, FY2004

0.95 million

Source: CRS presentation of FY2004 data from the DHS Office of Immigration Statistics.

As Figure 5 presents, Mexico led all countries with 175,364 aliens who became LPRs in FY2004. India followed at a distant second with 70,116 LPRs. The Philippines came in third with 57,827. These three countries comprise almost one-third of all LPRs in FY2004, and two exceeded the per-country ceiling for preference immigrants because they benefitted from special exceptions to the per-country

19 (...continued)
Relief Act of 1997.
ceilings. Mexico did so as a result of the provision in INA that allows 75% of family second preference (i.e., spouses and children of LPRs) to exceed the per-country ceiling, while India exceeded the ceiling through the exception to the employment-based per-country limits.

The top 12 immigrant-sending countries depicted in Figure 5 accounted for 57% of all LPRs in FY2004. The top 50 immigrant-sending countries contributed 88% of all LPRs in FY2004. Appendix A provides detailed data on the top 50 immigrant-sending countries by major category of legal immigration.

---

### Backlogs and Waiting Times

#### Visa Processing Dates

According to the INA, family-sponsored and employment-based preference visas are issued to eligible immigrants in the order in which a petition has been filed. Spouses and children of prospective LPRs are entitled to the same status, and the same order of consideration as the person qualifying as principal LPR, if accompanying or following to join (referred to as derivative status). When visa demand exceeds the per-country limit, visas are prorated according to the preference system allocations (detailed in Table 1) for the oversubscribed foreign state or dependent area. These provisions apply at present to the following countries...
oversubscribed in the family-sponsored categories: China, Mexico, the Philippines, and India.

**Source:** U.S. Department of State, Bureau of Consular Affairs, *Visa Bulletin for April 2006.*

As Table 4 evidences, relatives of U.S. citizens and LPRs are waiting in backlogs for a visa to become available, with the brothers and sisters of U.S. citizens now waiting almost 12 years. “Priority date” means that unmarried adult sons and daughters of U.S. citizens who filed petitions on April 22, 2001, are now being processed for visas. Married adult sons and daughters of U.S. citizens who filed petitions seven years ago (July 22, 1998) are now being processed for visas. Prospective family-sponsored immigrants from the Philippines have the most substantial waiting times before a visa is scheduled to become available to them; consular officers are now considering the petitions of the brothers and sisters of U.S. citizens from the Philippines who filed more than 22 years ago.

Because of P.L. 106-313’s easing of the employment-based per-country limits, few countries and categories are currently oversubscribed in the employment-based preferences. As Table 5 presents, however, some employment-based visa categories are once again unavailable. The Department of State’s *Visa Bulletin for July 2005,* offered the following explanation: “The Employment Third and Third Other Worker categories have reached their annual limits and no further FY2005 allocations are possible for the period July through September. With the start of the new fiscal year in October, numbers will once again become available in these categories.”

The *Visa Bulletin for September 2005* offered further information: “The backlog reduction efforts of both Citizenship and Immigration Services, and the Department of Labor continue to result in very heavy demand for Employment-based numbers. It is anticipated that the amount of such cases will be sufficient to use all available numbers in many categories...demand in the Employment categories is expected to

---

be far in excess of the annual limits, and once established, cut-off date movements are likely to be slow.”

When the Visa Bulletin for October 2005 became available, it was evident that third preference visas (professional, skilled and unskilled) were oversubscribed on a worldwide level. The countries that are particularly effected by the oversubscription of the employment-based preference categories are China and India. The visa waiting times have eased somewhat, as indicated by the data from the Visa Bulletin for April 2006, which is presented in Table 5.

* Schedule A refers to §502 of Division B, Title V of P.L. 109-13, which makes up to 50,000 permanent employment-based visas available for foreign nationals coming to work as nurses.

Petition Processing Backlogs

Distinct from the visa priority dates that result from the various numerical limits in the law, there are significant backlogs due to the sheer volume of aliens eligible to immigrate to the United States. As of December 31, 2003, USCIS reported 5.3 million immigrant petitions pending. USCIS decreased the number of immigrant petitions pending by 24% by the end of FY2004, but still had 4.1 million petitions pending. The latest processing dates for immediate relative, family preference, and employment-based LPR petitions are presented in Appendix B for each of the four USCIS Regional Service Centers.

---

22 According to USCIS, other immigration-related petitions, such as applications for work authorizations or change of nonimmigrant status, filed bring the total cases pending to over 6 million. Telephone conversation with USCIS Congressional Affairs, Feb. 12, 2004.

Even though there are no numerical limits on the admission of aliens who are immediate relatives of U.S. citizens, such citizens petitioning for their relatives are waiting at least a year and in some parts of the country, more than two years for the paperwork to be processed. Citizens and LPRs petitioning for relatives under the family preferences are often waiting several years for the petitions to be processed. Appendix B is illustrative, but not comprehensive because some immigration petitions may be filed at USCIS District offices and at the National Benefits Center.

Aliens with LPR petitions cannot visit the United States. Since the INA presumes that all aliens seeking admission to the United States are coming to live permanently, nonimmigrants must demonstrate that they are coming for a temporary period or they will be denied a visa. Aliens with LPR petitions pending are clearly intending to live in the United States permanently and thus are denied nonimmigrant visas to come temporarily.24

Legislation in 108th Congress

Legislation reforming permanent immigration came from a variety of divergent perspectives in the 108th Congress. The sheer complexity of the current set of provisions makes revising the law on permanent immigration a daunting task. This discussion focuses only on those bills that would have revised the permanent immigration categories and the numerical limits as defined in §201-§203 of the INA.25

On January 21, 2004, Senators Chuck Hagel and Thomas Daschle introduced legislation (S. 2010) that would, if enacted, potentially yield significant increases in legal permanent admissions. The Immigration Reform Act of 2004 (S. 2010), would have among other provisions: no longer deduct immediate relatives from the overall family-sponsored numerical limits; treat spouses and minor children of LPRs the same as immediate relatives of U.S. citizens (exempt from numerical limits); and reallocate the 226,000 family preference numbers to the remaining family preference categories. In addition, many aliens who would have benefited from S. 2010’s proposed temporary worker provisions would be able to adjust to LPR status outside the numerical limits of the per country ceiling and the worldwide levels.

Several bills that would offer more targeted revisions to permanent immigration were offered in the House. Representative Robert Andrews introduced H.R. 539, which would have exempted spouses of LPRs from the family preference limits and thus treated them similar to immediate relatives of U.S. citizens. Representative Richard Gephardt likewise included a provision that would have treated spouses of

24 §214(b) of INA. Only the H-1 workers, L intracompany transfers, and V family members are exempted from the requirement that they prove that they are not coming to live permanently.

LPRs outside of the numerical limits in his “Earned Legalization and Family Unity Act” (H.R. 3271). Representative Jerrold Nadler introduced legislation (H.R. 832) that would have amended the INA to add “permanent partners” after “spouses” and thus would have enabled aliens defined as permanent partners to become LPRs through the family-based immigration categories as well as to become derivative relatives of qualifying immigrants.

Legislation that would have reduced legal permanent immigration was introduced early in the 108th Congress by Representative Thomas Tancredo. The “Mass Immigration Reduction Act” (H.R. 946) would have zeroed out family sponsored immigrants (except children and spouses of U.S. citizens), employment-based immigrants (except certain priority workers) and diversity lottery immigrants through FY2008. It also would have set a numerical limit of 25,000 on refugee admissions and asylum adjustments. Representative J. Gresham Barrett introduced an extensive revision of immigration law (H.R. 3522) that also included a significant scaling back of permanent immigration.

Issues in the 109th Congress

President Bush’s Immigration Reform Proposal. When President George W. Bush announced his principles for immigration reform in January 2004, he included an increase in permanent legal immigration as a key component. The fact sheet that accompanied his remarks referred to a “reasonable increase in the annual limit of legal immigrants.” When the President spoke, he characterized his policy recommendation as follows:

The citizenship line, however, is too long, and our current limits on legal immigration are too low. My administration will work with the Congress to increase the annual number of green cards that can lead to citizenship. Those willing to take the difficult path of citizenship — the path of work, and patience, and assimilation — should be welcome in America, like generations of immigrants before them.

Some commentators are speculating the President is promoting increases in the employment-based categories of permanent immigration, but the Bush Administration has not yet provided specific information on what categories of legal permanent admissions it advocates should be increased. Details on the level of increases the Administration is seeking also have not been provided.

The President featured his immigration reform proposal in the 2004 State of the Union address, and a lively debate has ensued. Most of the attention has focused on the new temporary worker component of his proposal and whether the overall

proposal constitutes an “amnesty” for aliens living in the United States without legal authorization.

President Bush recently stated that immigration reform is a top priority. In an interview with the Washington Times, the President responded to a question about where immigration reform ranks in his second term agenda by saying, “I think it’s high. I think it’s a big issue.” The President posited that the current situation is a “bureaucratic nightmare” that must be solved.28

Provisions Receiving Action in First Session

**Recaptured Visa Numbers for Nurses.** Section 502 of Division B, Title V of P.L. 109-13 (H.R. 1268, the emergency FY2005 supplemental appropriation) amends the American Competitiveness in the Twenty-first Century Act of 2000 (P.L. 106-313) to modify the formula for recapturing unused employment-based immigrant visas for employment-based immigrants “whose immigrant worker petitions were approved based on schedule A.” In other words, it makes up to 50,000 permanent employment-based visas available for foreign nationals coming to work as nurses. This provision was added to H.R. 1268 as an amendment in the Senate and was accepted by the conferees.

**Recaptured Employment-Based Visa Numbers.** On October 20, 2005, the Senate Committee on the Judiciary approved compromise language that would, among other things, recapture up to 90,000 employment-based visas that had not been issued in prior years (when the statutory ceiling of 140,000 visas was not met). An additional fee of $500 would be charged to obtain these recaptured visas. This language was forwarded to the Senate Budget Committee for inclusion in the budget reconciliation legislation. On November 18, 2005, the Senate passed S. 1932, the Deficit Reduction Omnibus Reconciliation Act of 2005, with these provisions as Title VIII. These provisions were not included in the House-passed Deficit Reduction Act of 2005 (H.R. 4241).

The conference report (H.Rept. 109-362) on the Deficit Reduction Act of 2005 (S. 1932) was reported during the legislative day of December 18, 2005. It did not include the Senate provisions that would recapture employment-based visas unused in prior years. On December 19, the House agreed to the conference report by a vote of 212-206. On December 21, the Senate removed extraneous matter from the legislation pursuant to a point of order raised under the “Byrd rule” and then, by a vote of 51-50 (with Vice President Cheney breaking a tie vote), returned the amended measure to the House for further action.

Pending Senate Legislation

**Key Issues of Debate.** As the 109th Congress debates immigration control (i.e., border security and interior enforcement) and legal reform (i.e., temporary and permanent admissions), the proposals that would significantly expand the number of guest worker and other temporary foreign worker visas available each year and would

---

couple these increases with eased opportunities for these temporary workers to ultimately adjust to LPR status are among the most contentious.\(^\text{29}\) Whether the LPR adjustments of guest workers and other temporary foreign workers are channeled through the numerically limited, employment-based preferences or are exempt from numerical limits will obviously affect the future flow of LPRs. Whether the legislation permits aliens currently residing in the United States without legal status to adjust to LPR status, to acquire “earned legalization” or to obtain a guest worker visa also has affects on future legal permanent admissions.\(^\text{30}\) Although guest workers and other temporary foreign workers options as well as legalization proposals are not topics of this report, the issues have become inextricably linked to the debate on legal permanent admissions.

**Securing America’s Borders Act (S. 2454)/Chairman’s Mark.** Title IV of S. 2454, the Securing America’s Borders Act, which Senate Majority Leader Bill Frist introduced on March 16, 2006, as well as Title V in the draft of Senate Judiciary Chairman Arlen Specter’s mark circulated March 6, 2006 (Chairman’s mark) would substantially increase legal immigration and would restructure the allocation of these visas. The particular provisions in S. 2454 and the Chairman’s mark are essentially equivalent.

Foremost, Title IV of S. 2454 and Title V of the Chairman’s mark would no longer deduct immediate relatives of U.S. citizens from the overall family-sponsored numerical limit of 480,000. This change would likely add at least 226,000 more family-based admissions annually (based upon the current floor of 226,000 family-sponsored visas). The bills would increase the annual number of employment-based LPRs from 140,000 to 290,000. They also would no longer count the derivative family members of employment-based LPRs as part of the numerical ceiling. If each employment-based LPR would be accompanied by 1.2 family members (as is currently the ratio), then an estimated 348,000 additional LPRs might be admitted. The bills would “recapture” visa numbers from FY2001 through FY2005 in those cases when the family-based and employment-based ceilings were not reached.

Title IV of S. 2454 and Title V of the Chairman’s mark would raise the current per-country limit on LPR visas from an allocation of 7% of the total preference allocation to 10% of the total preference allocation (which would be 480,000 for family-based and 290,000 for employment-based under this bill). Coupled with the proposed increases in the worldwide ceilings, these provision would ease the visa wait times that oversubscribed countries (i.e., China, India, Mexico, and the
Philippines) currently have by substantially increasing their share of the overall ceiling.

Title IV of S. 2454 and Title V of the Chairman’s mark would further reallocate family-sponsored immigrants and employment-based visas. The numerical limits on immediate relatives of LPRs would increase from 114,200 (plus visas not used by first preference) to 240,000 annually. They would shift the allocation of visas from persons of “extraordinary” and “exceptional” abilities and persons having advanced professional degrees (i.e., first and second preferences), and increase the number of visas to unskilled workers 10,000 to 87,000 — plus any unused visas that would roll down from the other employment-based preference categories. Employment-based visas for certain special immigrants would no longer be numerically limited.31

Comprehensive Immigration Reform (S. 2611/S. 2612). As the Senate was locked in debate on S. 2454 and the Judiciary Chairman’s mark during the two-week period March 28-April 7, 2006, an alternative was offered by Senators Chuck Hagel and Mel Martinez. Chairman Specter, along with Senators Hagel, Martinez, Graham, Brownback, Kennedy, and McCain introduced this compromise as S. 2611 on April 7, 2006, just prior to the recess. The identical language has been introduced by Senator Hagel (S. 2612). Much like S. 2454 and S.Amdt. 3192, S. 2611/S. 2612 would substantially increase legal permanent immigration and would restructure the allocation of the family-sponsored and employment-based visas.

In its handling of family-based legal immigration, Title V S. 2611/S. 2612 mirrors Title IV of S. 2454 and Title V of the Chairman’s mark. It would no longer deduct immediate relatives of U.S. citizens from the overall family-sponsored numerical limit of 480,000. This change would likely add at least 226,000 more family-based admissions annually (based upon the current floor of 226,000 family-sponsored visas). The numerical limits on immediate relatives of LPRs would increase from 114,200 (plus visas not used by first preference) to 240,000 annually. Assuming that the trend in the number of immediate relatives of U.S. citizens continues at the same upward rate, the projected number of immediate relatives would be approximately 470,000 in 2008. Assuming that the demand for the numerically limited family preferences continues at the same level, the full 480,000 would be allocated. If these assumptions hold, the United States would likely be admitting or adjusting an estimated 950,000 family-sponsored LPRs by 2009, as Figure 6 projects.32

In terms of employment-based immigration, S. 2611/S. 2612 would increase the annual number of employment-based LPRs from 140,000 to 450,000 from FY2007 through FY2016, and set the limit at 290,000 thereafter. S. 2611/S. 2612 also would no longer count the derivative family members of employment-based LPRs as part of the numerical ceiling. As in S. 2454, S. 2611/S. 2612 would reallocate

32 20 CFR §656.
Employment-based visas as follows: up to 15% to “priority workers”; up to 15% to professionals holding advanced degrees and certain persons of exceptional ability; up to 35% to skilled shortage workers with two years training or experience and certain professionals; up to 5% to employment creation investors; and up to 30% (135,000) to unskilled shortage workers.

Employment-based visas for certain special immigrants would no longer be numerically limited. S. 26111/S. 2612 also would no longer count the derivative family members of employment-based LPRs as part of the numerical ceiling. If each employment-based LPR would be accompanied by 1.2 family members (as is currently the ratio), then an estimated 540,000 additional LPRs might be admitted. These estimates yield almost a million (990,000) employment-based LPRs and their accompanying family annually FY2007-FY2016, as Figure 6 projects.33

Figure 6. Projections of Employment-based and Family-based LPRs under S. 2611/S. 2612

Assuming "Demand" for Visas and Immediate Relatives Continue at Current Rates and Excluding Estimates of Temporary Worker Adjustments Exempt from Preference Allocations

Note: Future Employment-based 4th preference special immigrants and 5th preference investors have too many unknown factors to estimate.
Source: CRS analysis of data from the DHS Office of Immigration Statistics and the former INS.

In addition, special exemptions from numerical limits would also be made for widows and orphan who meet specified risk factors and aliens who have worked in the United States for three years and who have earned an advanced degree in science, technology, engineering, or math. The bills would further increase overall levels of immigration by reclaiming family and employment-based LPR visas when the annual ceilings were not met, FY2001-FY2005. As noted earlier, unused visas from one

---

33 20 CFR §656.
S. 2611/2612 are among those bills that would significantly expand the number of guest worker and other temporary foreign worker visas available each year and would couple these increases with eased opportunities for these temporary workers to ultimately adjust to LPR status. Whether the LPR adjustments of guest workers and other temporary foreign workers are channeled through the numerically limited, employment-based preferences or are exempt from numerical limits (as are the proposed F-4 foreign student fourth preference adjustments) will obviously affect the projections and the future flows.

S. 2611/2612 includes a provision that would exempt from direct numerical limits those LPRs who are being admitted for employment in occupations that the Secretary of Labor has deemed there are insufficient U.S. workers “able, willing and qualified” to work. Such occupations are commonly referred to as Schedule A because of the subsection of the code where the Secretary’s authority derives. Currently, nurses and physical therapists are listed on Schedule A, as are certain aliens deemed of exceptional ability in the sciences or arts (excluding those in the performing arts).

Title V of S. 2611/S. 2612 would raise the current per-country limit on LPR visas from an allocation of 7% of the total preference allocation to 10% of the total preference allocation (which would be 480,000 for family-based and 450,000/290,000 for employment-based under this bill). Coupled with the proposed increases in the worldwide ceilings, these provisions would ease the visa wait times that oversubscribed countries (i.e., China, India, Mexico, and the Philippines) currently have by substantially increasing their share of the overall ceiling. The bills also would eliminate the exceptions to the per-country ceilings for certain family-based and employment-based LPRs, which are discussed above.

---

34 For an analysis of other major elements of these bills, see CRS Report RL32044, Immigration: Policy Considerations Related to Guest Worker Programs, by Andorra Bruno; and, CRS Report RL30498, Immigration: Legislative Issues on Nonimmigrant Professional Specialty (H-1B) Workers, by Ruth Ellen Wasem.

35 In S. 2611/S. 2612, unauthorized aliens who have been residing in the United States prior to April 5, 2001, and meet specified requirements would be eligible to adjust to LPR status outside of the numerical limits of INA. An estimated 60% of the 11 to 12 million unauthorized aliens residing in the United States may be eligible to adjust through this provision, according to calculations based upon analysis by demographer Jeffrey Passel. “The Size and Characteristics of the Unauthorized Migrant Population in the U.S.: Estimates Based on the March 2005 Current Population Survey,” by Jeffrey S. Passel, Senior Research Associate, Pew Hispanic Center, available at: [http://pewhispanic.org/files/reports/61.pdf].

36 The per-country ceiling for dependent states are raised from 2% to 7%.

Other Comprehensive Reform Legislation

Secure America and Orderly Immigration Act (S. 1033/H.R. 2330).
On May 12, 2005, a bipartisan group of Senators and Congressmen introduced an expansive immigration bill known as the Secure America and Orderly Immigration Act (S. 1033/H.R. 2330). Among other things, these bills would make significant revisions to the permanent legal admissions sections of INA. Specifically Title VI of the legislation would

- remove immediate relatives of U.S. citizens from the calculation of the 480,000 annual cap on family-based visas for LPR status, thereby providing additional visas to the family preference categories;
- lower the income requirements for sponsoring a family member for LPR status from 125% of the federal poverty guidelines to 100%;
- recapture for future allocations those LPR visas that were unused due to processing delays from FY2001 through FY2005;
- increase the annual limit on employment-based LPR visa categories from 140,000 to 290,000 visas; and
- raise the current per-country limit on LPR visas from an allocation of 7% of the total preference allocation to 10% of the total preference allocation (which would be 480,000 for family-based and 290,000 for employment-based under this bill).

Comprehensive Enforcement and Immigration Reform Act of 2005.
The Comprehensive Enforcement and Immigration Reform Act of 2005 (S. 1438), introduced by Senators John Cornyn and Jon Kyl on July 20, 2005, has provisions that would restructure the allocation of employment-based visas for LPRs. Among the various proposals, Title X of this legislation would make the following specific changes to the INA provisions on permanent admissions:

- reduce the allocation of visas to persons of “extraordinary” and “exceptional” abilities and persons having advanced professional degrees (i.e., first and second preferences);
- increase the number of visas to unskilled workers from a statutory cap of 10,000 annually to a level of 36% of the 140,000 ceiling for employment-based admissions (plus any other unused employment-based visas);
- eliminate the category of diversity visas; and
- recapture for future allocations those employment-based visa numbers that were unused from FY2001 through FY2005.

38 In the Senate, the co-sponsors are Senators John McCain, Ted Kennedy, Sam Brownback, Ken Salazar, Lindsey Graham and Joe Lieberman. In the House, the co-sponsors are lead by Representatives Jim Kolbe, Jeff Flake and Luis Gutierrez.

39 For an analysis of other major elements of these bills, see CRS Report RL32044, Immigration: Policy Considerations Related to Guest Worker Programs, by Andorra Bruno.
Immigration Accountability Act of 2005. As part of a package of four immigration reform bills, Senator Chuck Hagel has introduced the Immigration Accountability Act of 2005 (S. 1919), which would provide for “earned adjustment of status” for certain unauthorized aliens who meet specified conditions and would expand legal immigration. In terms of permanent legal admissions, S. 1919 would among other provisions:

- no longer deduct immediate relatives from the overall family-sponsored numerical limits of 480,000;
- treat spouses and minor children of LPRs the same as immediate relatives of U.S. citizens (i.e., exempt from numerical limits); and
- reallocate the 226,000 family preference numbers to the remaining family preference categories.

The Hagel immigration reform proposal also includes legislation revising the temporary worker programs, border security efforts, and employment verification.

Immigration Control and Reform Legislation

Enforcement First Immigration Reform Act of 2005. Title VI of the Enforcement First Immigration Reform Act of 2005 (H.R. 3938), introduced by Representative J.D. Hayworth, focuses on revising permanent admissions. H.R. 3938 would increase employment-based admissions and decrease family-based admissions. More specifically, it would

- increased the worldwide ceiling for employment-based admissions by 120,000 to 260,000 annually;
- within the employment-based third preference category, double unskilled admission from 10,000 to 20,000;
- eliminate the family-based fourth preference category (i.e., adult sibling of U.S. citizens); and
- eliminate the diversity visa category.

H.R. 3938 also has two provisions aimed at legal immigration from Mexico: §604 would place a 3-year moratorium on permanent family-preference (not counting immediate relatives of U.S. citizens) and employment-based admissions from Mexico; and §605 would amend the INA to limit family-based immigration from Mexico to 50,000 annually.

Reducing Immigration to a Genuinely Healthy Total (RIGHT) Act of 2005. On September 8, 2005, Representative Thomas Tancredo introduced the “Reducing Immigration to a Genuinely Healthy Total (RIGHT) Act of 2005" (H.R. 3700), which would substantially overhaul permanent admissions to the United States. Among other provisions, H.R. 3700 would

- reduce the worldwide level of employment-based immigrants from 140,000 to 5,200 annually;
- limit the 5,200 employment-based visas to persons of “extraordinary” and “exceptional” abilities and persons having advanced professional degrees (i.e., first and second preferences);
• eliminate the family preference visa categories; and
• eliminate the category of diversity visas.

Additional Immigration Reduction Legislation. Representative J. Gresham Barrett has introduced an extensive revision of immigration law (H.R. 1912) that also includes a significant scaling back of permanent immigration. This legislation is comparable to legislation he introduced in the 108th Congress.

Permanent Partners. Representative Jerrold Nadler has introduced legislation (H.R. 3006) that would amend the INA to add “permanent partners” after “spouses” and thus would enable aliens defined as permanent partners to become LPRs through the family-based immigration categories as well as to become derivative relatives of qualifying immigrants. This bill is comparable to legislation he introduced previously.

Petition Processing and Adjudication Funding

USCIS funds the processing and adjudication of immigrant, nonimmigrant, refugee, asylum, and citizenship benefits largely through monies generated by the Examinations Fee Account.\(^{40}\) The Administration increased the fees charged to U.S. citizens and legal permanent residents petitioning to bring family or employees into the United States and to foreign nationals in the United States seeking immigration benefits.\(^{41}\) In FY2004, 86% of USCIS funding came from the Examinations Fee Account. In FY2005, USCIS has budget authority for $1.571 billion from the Examinations Fee Account.\(^{42}\) Congress provided a direct appropriation of $60 million in FY2005 to reduce the backlog of applications and to strive for a six-month processing standard for all applications by FY2006.\(^{43}\)

FY2006. The Administration sought $1.81 billion for USCIS for FY2006. This figure would have been an additional $79 million for FY2006, a 5% increase over FY2005. For direct appropriations, the Administration requested $80 million — a cut of $80 million from FY2005 and a cut of $155 million from the $235 million Congress appropriated in FY2004. A decrease of 26% in backlog reduction and customer service activities was proposed for FY2006. The House-passed bill making FY2006 appropriations for the Department of Homeland Security (H.R. 2360) would have provided an increase of $40 million above the President’s request for a total of $120 million, which would have been $40 million less than FY2005.

\(^{41}\) For example, the I-130 petition for family members went from $130 to $185, the I-140 petition for LPR workers went from $135 to $190, the I-485 petition to adjust status went from $255 to $315, and the N-400 petition to naturalize as a citizen went from $260 to $320. Federal Register, vol. 69, no. 22, Feb. 3, 2004, pp. 5088-5093.
\(^{43}\) The President’s Budget request for FY2002 proposed a five-year, $500 million initiative to reduce the processing time for all petitions to six months. Congress provided $100 in budget authority ($80 direct appropriations and $20 million from fees) for backlog reduction in FY2002. P.L. 107-77, conference report to accompany H.R. 2500, H.Rept. 107-278.
The Senate-reported version of H.R. 2360 would have provided $80 million for USCIS in direct appropriations, recommending $40 million less than provided in H.R. 2360 as passed by the House, and $80 million less than enacted in FY2005.

On September 29, 2005, the conference committee approved and filed the conference report (H.Rept. 109-241) to H.R. 2360. The conferees recommend a total of $1,889 million for USCIS, of which 94% comes from fees. The remaining 6% is a direct appropriation of $115 million, which includes $80 million for backlog reduction initiatives as well as $35 million to support the information technology transformation effort and to convert immigration records into digital format. The FY2006 appropriations amount is a decrease of 28% from the $160 million appropriated in FY2005. As a result of a 10% increase in revenue budgeted from fees, the FY2006 total is 6% greater than the FY2005 total. The President signed H.R 2360 as P.L. 109-90 on October 18, 2005.

**FY2007.** In terms of direct appropriations, the Administration is requesting $182 million — an increase of $68 million from FY2006. The Administration is requesting a total of $1,986 million for USCIS (an increase of 5% over the enacted FY2006 level of $1,888 million), the bulk of the funding coming from fees paid by individuals and businesses filing petitions. For FY2007, USCIS expects to receive a total of $1,804 million from the various fee accounts, most of which ($1,760 million) would be coming from the Examinations Fee Account. According to the USCIS Congressional Justification documents, funds from the Examinations Fee Account alone comprise 91% of the total USCIS FY2007 budget request. The FY2007 Budget also includes $13 million from the H-1B Nonimmigrant Petitioner Account and $31 million from the H-1B and L Fraud Prevention and Detection Account. The Administration proposes to use the $31 million generated from the fee on H-1B and L petitions to expand its Fraud Detection and National Security Office.

**Issues.** Many in Congress have expressed concern and frustration about the backlogs and pending caseload, and Congress has already enacted statutory requirements for backlog elimination. Former USCIS Director Eduardo Aguirre acknowledged the challenges his agency faces in testimony before the House Judiciary Subcommittee on Immigration, Border Security and Claims in 2004.

We fully realize that the increased funding requested in the budget alone will not enable us to realize our goals. We must fundamentally change the way we conduct our business. We are aggressively working to modernize our systems and increase our capacity through the reengineering of processes, the development and implementation of new information technology systems, and

44 §286(s) of INA; 8 U.S.C. §1356(s).
45 §286(v) of INA; 8 U.S.C. §1356(v).
46 USCIS added a Fraud Detection and National Security Office to handle duties formerly done by the INS’s enforcement arm, which is now part of DHS’s ICE Bureau. CRS Report RL33319, Toward More Effective Immigration Policies: Selected Organizational Issues, by Ruth Ellen Wasem.
47 For example, see §§ 451-461 of the Homeland Security Act of 2002 (P.L. 107-296).
the development of mechanisms to interact with customers in a more forward-reaching manner.\textsuperscript{48}

Pending caseloads and processing backlogs continue to plague USCIS. The U.S. Government Accountability Office (GAO) concluded that it is unlikely that USCIS will completely eliminate the backlog of pending adjudications by the 2006 deadline.\textsuperscript{49} Despite progress in cutting the backlog of pending cases from 3.8 million in January 2004 to 1.2 million in June 2005, GAO speculates that USCIS may have difficulty eliminating its backlog for the more complex application types that constitute nearly three-quarters of the backlog.\textsuperscript{50}

The DHS Inspector General found problems in the background checks for which USCIS is now responsible. Among other findings, the report concluded that USCIS’ security checks are overly reliant on the integrity of names and documents that applicants submit and that “USCIS has not developed a measurable, risk-based plan to define how USCIS will improve the scope of security checks.” It further stated that “USCIS’ management controls are not comprehensive enough to provide assurance that background checks are correctly completed.”\textsuperscript{51} Most recently, GAO expanded on the concerns of the DHS Inspector General detailed in their report on USCIS.\textsuperscript{52}

The 109th Congress is expected to closely oversee progress in backlog reduction and improvements in background checks.

\textsuperscript{49} The Immigration Services and Infrastructure Improvements Act of 2000 (§ 205(a) of P.L. 106-313, 8 U.S.C. § 1574(a)) defines backlog as the period of time in excess of 180 days that an immigration benefit application has been pending before the agency. USCIS defines backlog as the number of pending applications (i.e., the number of applications awaiting adjudication) in excess of the number of applications received in the most recent six months.
